EDUCATION	<p><b>Ulsan National Institute of Science and Technology</b>, Ulsan, Republic of Korea <i>Master in, Computer Engineering, March '18 - Present</i></p> <p><b>Ulsan National Institute of Science and Technology</b>, Ulsan, Republic of Korea <i>Bachelor in, Electrical and Computer Engineering, March '10 - February '18</i> <i>including 2 years of military service</i></p>
RESEARCH INTERESTS	<p>Human-Computer Interaction (Especially on AR and Wearable Devices) Visualisation &amp; IOT</p>
COMPUTER SKILLS	<p><b>Languages:</b> Python, C#, HTML, JavaScript, Ajax, ... <b>Technologies:</b> Keras, Flask, MongoDB, ...</p>
RESEARCH EXPERIENCE	<p><b>Building Diagram for How MERS-CoV is Spreaded</b> <i>Supervisor : Prof. Chang-Hyeong Lee, UNIST Internship, March '12 - May '12</i></p> <ul style="list-style-type: none"><li>- Poster exhibition at UNIST</li><li>- By drawing flows about how infectees will be infected, cured or died as a diagram,</li></ul> <p><b>Reconstructing Perpendicular Images from Multi-Scale Images of the Brain</b> <i>Supervisor : Prof. Won-Ki Jeong, UNIST Internship, Nov. '12 - February '13</i></p> <ul style="list-style-type: none"><li>- Down sampled images from set of several parallel cross-sectional images of the brain in high resolution, reconstruct the perpendicular images in clear resolution</li></ul> <p><b>AirScope: Visualizing Fine Dusts in AR</b> <i>Supervisor : Prof. Sung-Ahn Ko and Prof. Young-Woo Park, UNIST Internship, June '17 - Dec. '17</i></p> <ul style="list-style-type: none"><li>- Submit to HCI Korea '18 Creative Award</li><li>- Cooperated with a design background student</li><li>- Built a concept of AR device to show how many fine dusts exist in the air intuitively</li></ul> <p><b>OK, Developers, Now you can design: An Interactive feedback-based Mobile GUI Prototyping Tool</b> <i>Supervisor : Prof. Sung-Ahn Ko, UNIST June '18 - Sep. '18</i></p> <ul style="list-style-type: none"><li>- Under Submitting to <i>ACM UIST '19</i> as the third author</li><li>- Interviewed with 16 novice developers to understand their problems with an existing tool</li><li>- Built a mobile GUI prototyping tool in Google Extension that provides instant feedback on users design</li></ul>
AWARDS & ACHIEVEMENTS	<p>Awarded the <b>Creative Award</b> for design work presentation at HCI KOREA '18 Registered patent application named 'Visualization Apparatus for Displaying Fine Dust' as patent number 18-83657</p>
